

Laboratório Aberto – Maker Lab

Motivation

The Maker Lab is an innovative environment where people from different profiles and skills can work collaboratively in the developing of new products and business projects. Furthermore, the program promotes an event called ITA Challenge, which aim to foster entrepreneurship and innovation in the academic community.

Objective

To facilitate the study of new technological concepts of engineering and business, through innovation mentorship, entrepreneurship events and prototype manufacture.

Approach

Provide an innovative environment for new products concepts and projects development both in the academy community and in the industry field. In addition, promote innovation and entrepreneurship events in partnership with companies and universities from the country.
